

Since the first rays split the firmament at the dawn of time, light has been our essence and our guide. Only through illumination do we find our definition, the radiant source of all understanding. As we plunge blindly into life or lose ourselves in love and desire, the formless infinite of uncertainty engulfs us. But the bright effluence of the heart, the very light of the cosmos, catches us as we open

outwards into deep and dazzling light

From a tranquil woodland where pearly orbs glow up like blossoms, to an inferno of glaring, flaring lasers, we will light up the darkest recesses of your mind and radiate through every vein.

Trinity College brings you illumina.
